

WALDORF SCHOOL of Lexington

Preschool to Grade 8

"Working with A.C.T. for Safety has been a game changer for our school. We are a small private school, with children in Pre-K through Grade 8. Every year, we ask our experienced teaching faculty and staff to undergo CPR, First Aid and School Safety Training. It may sound like a simple task, but over the years our goals have grown to be prepared for a variety of emergency and disaster situations, many of which are difficult and emotionally challenging to talk about. In past years, we have had staff complain that the trainings we do are too stressful and anxiety producing - BUT THEN WE FOUND A.C.T. FOR SAFETY!!! Working with them has been empowering for all of us: folks with little to no background in safety or emergency planning left the trainings feeling like they had the knowledge and tools they need to keep our students and each other safe in a variety of situations. Our faculty and staff felt informed, not scared, and the hands-on practice and safety drills helped reduce any anxiety and fear, replacing it with strategies and muscle memory to build on. Our Safety Team at school has made incredible strides in our SEOP planning, and families have remarked how well-prepared our staff are. Feeling empowered and prepared when facing an emergency situation is priceless - thank you A.C.T. for Safety for your expert help!"
